Fluid logistics for an ever-changing world.

Today's movement of product comes with an ever evolving set of challenges.

The dramatic shift in distribution strategies has collided headfirst with the growing need for single-source, transparent and sustainable logistics. Add driver shortages, increased safety criteria, and unpredictable marketplaces and status quo logistics is a thing of the past.

Today, no matter what your business model, **B2B, B2C, or DTC**, you need a 'can do' 3PL that adds value not only by meeting your KPI's but also by partnering with you to navigate the unprecedented turbulence that stands between you and satisfied customers.

Streamlining supply chain complexities.

Delivering Custom Solutions

Enter Wavepoint 3PL. Through our suite of transportation, warehousing, and logistics offerings, we touch virtually every point in the supply chain adding value by streamlining the complexities. We operate as an extension of your business, offering the flexibility that you need, and as our name suggests, Wavepoint is seamless, fluid, and moving into the future.

Through organic growth of our enterprises, we are brought together under new entrepreneurial leadership that is now aligned with the shared visions of excellence, supported by an expert staff and best-in-class assets, and the all-important 'can do' spirit. Leveraging our asset and non-asset services, we remain fluid in our solutions, responding quickly and without compromise to the changing supply chain landscape and our clients' needs.

Why not tackle your logistics challenges with a solution that's better, faster, and more efficient? Let's ride the Wavepoint.

Our fleet is your fleet. LTL and Truckload Services

As a core service, Wavepoint 3PL transportation is second to none. With our asset based fleet, we can transport a single load, deliver direct to retail stores, operate dedicated fleets, and manage the entire transportation function. We cover virtually all major lanes at competitive rates. Combine this on-demand asset with best-of-class technology, experienced transportation managers, and a professional driving team, and you have an excellent resource for all your transportation needs.

- Nationwide OTR truckload and LTL coverage
- TMS for optimum load planning and asset utilization
- Impeccable safety rating
- Transportation analysis to improve cost and performance
- Pool distribution and multi-stop, time-sensitive delivery
- Customized equipment for specific applications
- Develop new dedicated fleets or assume existing fleet operations
- Shuttle service to support customer production
- Air, expedited, final mile, and dedicated

Leverage our technology for easy LTL and truckload tendering, tracking, KPI measurement, and visibility.

Food grade facilities with hands on service.

Warehouse and Inventory Management

Enter Wavepoint 3PL. We operate as an extension of your business, offering the flexibility that you need, and as our name suggests, Wavepoint is seamless, fluid, and moving into the future.

- Nationwide OTR truckload and LTL coverage
- TMS for optimum load planning and asset utilization
- Impeccable safety rating
- Transportation analysis to improve cost and performance
- Pool distribution and multi-stop, time-sensitive delivery
- Customized equipment for specific applications
- Develop new dedicated fleets or assume existing fleet operations
- Shuttle service to support customer production

WAVEPOINT COLD
Cold perfection.

The be everywhere fulfillment solution.

Omnichannel Fulfillment Services

Digitization of the industrial market is quickly gaining on DTC eCommerce. Manufacturers now need to meet retail-like expectations for high-service, low-costs among their industrial customers. We can help you excel in **omnichannel order fulfillment services**, ranging from full and partial pallet retail orders to delivery of special sized products to complex, pick intensive eCommerce. Our technology accurately manages lot rotation requirements, case/unit pick, RF inventory management and data collection, special handling/labeling, and the unique order handling associated with the growing number of DTC businesses within the marketplace.

- SKU intensive and time-sensitive pick, pack, and parcel
- Special kitting, assembly, and labeling
- Retail promotional display packs
- Amazon and other dropship programs
- Return logistics
- International orders
- B2B and DTC order fulfillment

You can no longer afford to be shipper agnostic. Your logistics provider is an extension of your brand. Go first class. Go Wavepoint.

We can deliver more.

Value Added Services

With our service flexibility comes our customized care. It all begins with an exacting analysis of our client's manufacturing process, vendor network, location and shipping lots, order cycle times and replenishment requirements to provide a comprehensive solution for optimum supply chain efficiency. For there we can isolate your supply chain tasks that may require an extra touch.

Fluctuations

Because Wavepoint offers expertise in high-volume, SKU-intensive order processing, customers can depend on Wavepoint to respond quickly to market fluctuations, promotions, seasonal demands or even new product introductions.

Further Packaging

Extends to additional manufacturing, bulk repacking, POS/POP display assembly and other postponement services.

Unique

Especially critical in e-commerce fulfillment requiring unique packaging, kitting and parcel service.

Repacking

Meeting the demands of stringent Club store SKU repacking.

Distribution

In support of manufacturers, food service and wholesalers, Wavepoint builds critical mass among customers to provide cost-saving pool distribution. Our hub in Pennsylvania provides one-call solution to serving clients with national distribution demands but with orders that don't support truckload volumes.

Inventory management is just a log in away. Transportation and Warehouse Technology

We are on the leading edge of warehouse technology, accommodating virtually any customer-defined inventory rotation, barcoding and data collection, with optimized slotting for more efficient operations. From put-away to case pick, we follow data-based procedures with higher accuracy, greater accountability, and faster throughput.

This technology-driven approach is evident in our transportation as well. Our **TMS system** is an intuitive software platform that determines least-cost delivery options, including accessorial costs, customer delivery preferences, and more. In addition to providing complete visibility, our TMS automates load building based on customer purchase orders, configuring similar products, ship date, and lanes to maximize capacity and optimize moves. It automatically rates and routes, then calculates truckload and multi-stop LTL shipments across our pool of qualified carriers based on customer routing guides.

Technology drives increased efficiency and streamlined operations
in our clients' supply chains.

What makes a **Wavepoint 3PL** a better solution?

Start with a supply chain need. Through a careful analysis of business requirements, cost drivers, service differentiators, facility infrastructure, and systems capabilities, Wavepoint 3PL will design, implement, and manage a supply chain solution tailored to your specific needs.

- ▶ Our optimization and modeling tools support supply chain evaluations, facility network appraisals, transportation assessments, and warehousing and inventory analysis.
- ▶ We make a critical, mathematical analysis of current supply chain operations to evaluate performance as it relates to bottom-line efficiency; its support of corporate objectives and its KPI's measured against industry best practices.
- ▶ We plan for the future and your ability to respond to anticipated and unanticipated variations and develop a fluid decision-making process to address issues.

You can no longer afford to be shipper agnostic. Your logistics provider is an extension of your brand. Go first class. Go Wavepoint.
